

# APX™

Graco's first dedicated Airless wall finishing plaster spray equipment

## PROFESSIONAL ADVANTAGES

- Dedicated for plaster wall smoothing and finishing, for the true professional
- Pumps the heaviest materials with optimal output and without fluctuations
- All-in-one design, easy to move around on your job site

Painter - Texture Applications  
APX™ 6200 - APX™ 8200

# APX™

## All-in-One Plaster Sprayers for the true Professional

The next step in Graco's Airless solutions for plaster wall smoothing and finishing:

➤ **ALL-IN-ONE**

Its compact, all-in-one design includes the hopper. Plug in, fill the hopper and you're ready to go!

➤ **MORE PERFORMANCE**

A better, more consistent spray fan in large tip sizes, offering more flow and less time knifing down material

➤ **IN ALL MATERIALS**

Stop losing time mixing or thinning your plaster before spraying. No more issues with cavitation and losing prime due to heavy materials.

For decades, Graco has been a key player in providing Airless spray equipment for plaster wall smoothing and finishing. Both Mark Max and T-Max™ are brands you helped us establish in the market.

We didn't want to stop there though. We continued listening to what you - our customer - wants. It is, therefore, with great pride that we can now announce the launch of our very first truly dedicated range of plaster spray equipment: the **APX™ 6200** and **APX™ 8200**.

We wanted to continue leading through innovation and to make your job much, much easier. After all, look at how we've designed our APX™ sprayers and when you compare these to our competitors' technology equipment, you'll see that you will:

**DO MORE M<sup>2</sup> A DAY**

Since we work at higher pressure, you will get more material output than any other competitive technology equipment, using the same tip size. **Up to 50% more!**

**SPEND LESS TIME AND MONEY ON MAINTENANCE AND REPAIRS**

No augers that can break, hardened steel gears and a pump that is much less prone to wear in aggressive materials. Having packings replaced instead of needing to buy an entire pump is much more cost-effective. But you can also benefit from the ProConnect™ tool-less pump removal and carry a spare pump you can swap out in just seconds. No expensive downtime anymore!

**GET YOUR UNIT ONTO, AROUND AND OFF THE JOB SITE MUCH FASTER**

Typically smaller in size, more compact in design and lighter than any competitive technology machine, the APX™ is easy to wheel around on big job sites, and both the hopper and the pump can be removed in an instant for easier transport.

**GET A RELIABLE UNIT  
FOR A VERY COMPETITIVE PRICE**

Tired of having a machine that spends more time in the shop than on a job? The APX™ offers better reliability than competitive technologies, typically at a lower acquisition cost.

**4 or 6 Bag Hopper with VIBRA-FLO™**

- Exclusive vibration system that helps convey even the thickest materials to the pump
- Single knob variable control
- Integrated system requires no extra power cords
- No need for augers to feed material into pump - easier to clean
- Integrated filter

**SmartControl™ 3.0**

- Delivers consistent spray fan without pressure fluctuation
- Extra-large LED readout displays pressure, litres, hours and more
- Easy 1 knob control

**Welded Steel Cart**

- Front swivel wheel
- 3-wheel design with locking
- Easy, one-man transport and storage
- Integrated tool tray and lift handles

**Endurance™ Airless Piston Pump with ProConnect™ 2**

- Proven to have longest life in the industry
- Available in complete hard chrome or complete MaxLife™, depending on your materials

### X-FLO™ Hose with Super-Flex™ Whip Hose

- Reduces pulsation for a better finish to reduce hand finishing
- Heavy-duty construction
- Easy to clean

### New Design Adjustable Bag Roller

- Completely empties bags with no waste or mess
- Adjustable to fit any bag length
- Maintenance-free design

### No More Mixing or Thinning

Spray the heaviest of materials without losing time preparing

### Save Material & Cost

Our new bag roller design can be adjusted to fit the bag, so no loss of material

### Easy Transport

Tool-less removal of both hopper and pump

## Did You Know?

You can also benefit from the APX™ VIBRA-FLO™ advantage on your Mark Max sprayers!

### Versatile

- Works with all Airless TexSpray™ pumps
- Holds up to 6 bags (95 litre)

### VIBRA-FLO™ System

- Exclusive vibration system that helps convey even the thickest materials to the pump
- Single knob variable control
- Integrated system requires no extra power cords
- No maintenance system offers peace of mind

## The All-in-One Heavy Material Application System

### How it works

- Material is squeezed from bag into hopper
- VIBRA-FLO™ hopper shakes and conveys material to pump inlet
- Material enters pump and filter-less manifold and hose
- Material flows through pulsation-reducing X-FLO™ hose to gun and is applied

## ! TIP

Gain more time  
Use your sprayer in combination with the APX™ hose reel
